

# BilanCyn®

# TRULY NO CONGESTION IN DIGESTION.

Veggi caps  
Lactose-free

**BilanCyn®** –  
with artichoke power.

## With artichoke power

**THE QUEEN OF VEGETABLES.** As one of the oldest vegetable varieties, the artichoke belongs to the daisy family. Already in ancient times, the Greeks and Romans highly appreciated the diverse properties of its large, violet flower heads.

Its reputation as a delicacy comes particularly from its pleasantly bitter taste. The fleshy leaves of the artichoke were already used medicinally in ancient Egypt\*, particularly to promote metabolism and digestion.

**NEW!**  
LACTOSE-FREE  
+ VEGAN

## For the symptomatic relief of digestive disorders with bloating or flatulence

The digestive organs are the powerhouse of the human body, but today hasty eating, an unhealthy diet and daily stress cause ever more people to have digestive disorders – a growing disease of civilisation.

The artichoke can put this right: Thanks to their digestive effect, its leaves act to relieve flatulence and bloating.

## Proven help for a healthy and trouble-free digestion – lactose-free and vegan!

One out of every five people in this country is classified as lactose-intolerant\*\* and products that contain lactose cause symptoms such as abdominal pain, diarrhoea or flatulence in many people. Moreover, the number of people interested in vegan products is increasing. BilanCyn® takes these issues seriously and does not contain lactose or animal products.

The special power of the artichoke is based on the particular combination of its natural ingredients.
